

# Outdoor Sound Curtains

©2003-2008 Unger Technologies, Inc. All Rights Reserved.

Outdoor sound curtains/blankets offer our clients proven noise control outside to help mitigate noise from a neighboring property.

- cost effective blanket panels
- modular curtain panels
- proven noise abatement outside
- resists UV rays, rain, snow, wind

## Problem:

Noise being emitted from a property is "bothering" the neighboring property. This can be caused from a variety of sound sources including; construction sites, outdoor compressors, generators, pumps, outdoor restaurants, and many more

## Solution:

Our outdoor model UNC-XT-1 sound curtains are engineered as a outside noise control barrier. The composite construction absorbs sound and blocks unwanted sound. This can be a temporary or permanent solution.

*Outdoor blower before*

*Outdoor blower after*

## Acoustical Performance:

ASTM E-90 & E 413

### Sound Transmission Loss

OCTAVE BAND FREQUENCIES (Hz)							
Product	125	250	500	1000	2000	4000	STC
UNC-XT-1	11	16	24	30	35	30	27

ASTM C 423

### Sound Absorption Performance

OCTAVE BAND FREQUENCIES (Hz)							
Product	125	250	500	1000	2000	4000	NRC
UNC-XT-1	.12	.47	.85	.84	.64	.62	.70
