

Transfer Pump Noise Control

©2003-2008 Unger Technologies, Inc. All Rights Reserved.

Transfer Pump noise control can lower outdoor sound levels in residential locations. Unger Technologies offers proven, tested sound enclosures and sound barriers to meet your city's sound level ordinance.

Features Include:

- Sound reduction of 12 – 24 dBA
- Portable and modular panel system
- Outdoor use
- Durable and rugged

Problem:

Large diesel driven transfer pumps are noise machines that typically run 24 hours a day and can be installed close to residential homes and neighbors.

Solution:

Unger can supply reusable sound enclosures that can be temporarily installed outdoors around the offensive pump noise. Our noise abatement techniques and products can lower sound levels to meet city noise ordinances.

Sound Transmission Loss

Product	OCTAVE BAND FREQUENCIES (Hz)						STC
	125	250	500	1000	2000	4000	
UNC-XT-1	11	16	24	30	35	30	27

ASTM E-90 & E 413

Sound Absorption Performance

Product	OCTAVE BAND FREQUENCIES (Hz)						NRC
