

TECHNICAL DATA SHEET

Sound Curtain Enclosure Ventilation

Unger Technologies offers sound curtain enclosure ventilation baffles constructed of UNC-13 curtain material or acoustically lined sheet metal

- Class A (or 1) flammability rated per ASTM E84
- Available facing colors: gray, white, black, or tan
- Available barrier colors: gray, tan, or blue

Applications:

Typically used in acoustical curtain enclosures where airflow to equipment is required. Frequently used as a passive ventilation system that utilizes convection to draw air through acoustical curtain enclosures. Also, forced air ventilation fans may be added for high volume cooling.
